Allowable Subject Matter

1. Claims 1-36, 41-44, 50, 52, 53, 56-59, 62-69, 73 and 77, which have been renumbered as 1-57 respectively, are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-57, the prior art of record fails to teach of creating entries only for frames received through physical ports connected directly to end-stations, creating entries for at least some of the frames which require a policy which differs from a default policy only in quality of service and creating entries for at least some of the frames which require a policy which differs from a default policy only in tasks other than quality of service. The closest reference, Ross et al. (U.S. Patent No. 6,658,002), teaches of a method of performing policy enforcement by a switch comprising: receiving a plurality of frames; comparing at least some of the received frames to a list of groups of frames and respective policies; and creating entries in the list for less than all of the compared frames for which no match was found in the comparison to the list, but fails to teach of creating entries only for frames received through physical ports connected directly to end-stations, creating entries for at least some of the frames which require a policy which differs from a default policy only in quality of service, and creating entries for at least some of the frames which require a policy which differs from a default policy only in tasks other than quality of service.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
